

"We believe in it!"

HA! HA!

20

WE KNEW that moving to Spain would keep us in the "asset rich cash poor" society. However news of draconian inheritance tax rules hit hard, neither of us wanted the other to suffer even more than necessary during bereavement.

Furthermore it was obvious that without some forethought our children would have little chance of successfully inheriting our estate when both of us die.

We made extensive enquiries and spoke to all the major advisors in this area. Some succeeded in clouding the issue, others could not offer a solid solution and sadly others were just pushy salesmen.

Henry Woods however were different. Contact was swiftly followed up by a courteous and sympathetic advisor who spent a relaxing hour at our home.

He carefully and sensitively established our concerns and addressed them with an excellent solution. Within two days we had a personally delivered

report that was informative and easy to read. It explained in detail the strengths of the suggestion as well as prudently advising on cautionary matters. We felt confident that the Henry Woods plan was the best for us and started what was to be a very simple application process.

The capital made available soon after has enabled us to finish our home building project

and we look forward to substantial financial rewards each year. Furthermore we can choose to take this cash growth immediately or plough it back for even higher rewards later.

We have no hesitation in recommending Henry Woods and SPAIRS to any one and we are sure their professionalism and integrity will shine brightly for a good time to come.

We believe in it!

HAVING HAD a successful relationship over many years after transferring our investment portfolio to the guidance of Henry Woods, we were naturally "all ears" when they presented their Wealth Preservation Scheme.

It has to be admitted that we were previously unaware of our serious exposure to Spanish Inheritance Tax and having over the last 15 years made improvements and further purchases of land around us in order to secure our privacy, our home has become a significant part of our wealth.

After making extensive and independent enquiries via a solicitor relative in the UK we were happy to proceed.

During the ensuing period a new and improved offer came from Rothschild bank and we were particularly comforted by their statement that "at Rothschild we are insistent that customers are not exposed to unexpected risks therefore our ultra cautious approach include a 100% capital guarantee".

Having met a very switched-on Director from Rothschild we became even more certain that the scheme was sound. We

were delighted with every aspect of the application process which included answering very detailed questions when completing the Application Forms.

So, what can we say other than we have been delighted with the attitude from all at Henry Woods, they have shown nothing but absolute professionalism and integrity throughout.

We have no hesitation in recommending Henry Woods and S.P.A.I.R.S. to you.

We believe in it!
